

## Preliminary Projects for 2025-2026

Project Description	
1	Campus operations annual funding 2026
2	Customer Interface for Resource Adequacy (CIRA) technology upgrade
3	Congestion revenue rights (CRR) replacement phase 2
4	Congestion revenue rights enhancements
5	Control center foundational improvements and modernization
6	Data analytics tools enhancements
7	Demand and distributed energy market integration
8	EDAM congestion revenue allocation enhancements
9	EDAM operation Improvements
10	End-of-life technology & vulnerability remediation Phase 4
11	Energy storage modeling enhancements
12	Facilities reserve annual funding
13	FERC 2023 generation interconnection enhancements
14	FERC 760 enhancement of electricity market surveillance and analysis
15	FERC 881 managing transmission line ratings
16	Foundational critical infrastructure hardware and software refresh 2026
17	Gas resource management coordination
18	Greenhouse gas coordination
19	Initialization funding for capital projects

Project Description	
20	Interconnection process enhancements
21	New resource interconnection modernization
22	OASIS bulk download phase 2
23	Operations foundational improvements 2026
24	Price formation enhancements
25	Project office internal labor & core process backfill
26	Renewable and load forecast enhancements
27	Resource adequacy enhancements
28	Subscriber participating transmission owner model enhancements
29	Technology foundational improvements 2026
30	WEIM assistance energy transfer (AET) extension
31	Western energy market enhancements
