

Preliminary Projects for 2026-2027

Description	
1	Automatic creation of N-1 contingencies 2024-CA19 phase 2
2	Backup process for real-time assessment
3	Campus operations annual funding
4	Compliance process and tools Improvements
5	Congestion Revenue Rights (CRR) policy enhancements
6	Congestion Revenue Rights (CRR) system phase 2
7	Customer Interface for Resource Adequacy (CIRA) upgrade phase 2
8	Data analytics roadmap
9	Demand and distributed energy market integration
10	Energy Management System (EMS) upgrade
11	Enhanced curtailment calculator expansion for western Interconnect
12	Enhanced scheduling limits constraints
13	Extended Day Ahead Market Enhancements (EDAM) 2027
14	Facilities datacenter infrastructure
15	Facilities reserve annual funding
16	FERC 2023 generator interconnection life cycle
17	FERC 881 managing transmission line ratings
18	FERC 917 electronic quarterly reporting

Description	
19	Forecast alerts data storage enhancements
20	Foundational critical infrastructure hardware and software refresh 2027
21	Gas resource management
22	Greenhouse gas coordination
23	Infrastructure modernization program
24	Interconnection process enhancements
25	Market engine improvements
26	NERC reliability standards BAL-007
27	Operations foundational improvements 2027
28	Price formation enhancements
29	Project Management Office internal labor annual funding
30	Resource adequacy modeling and program design
31	Resource and transmission Implementation
32	Scheduling and logging infrastructure upgrade
33	Storage design and modeling customer enhancements
34	Technology foundational improvements for production 2027
