

2021-2022 Transmission Planning Process, Phase 3 Competitive Solicitation

List of Qualified Project Sponsors and Proposals

In the 2021-2022 Transmission Plan, the ISO identified a policy-driven need for the Collinsville 500/230 kV substation project to address multiple overloads on the 230 kV corridor between Contra Costa and Newark under normal, N-1, and N-2 contingency conditions. This initiated the Transmission Planning Process, Phase 3 Competitive Solicitation process for the selection of an approved project sponsor. The bid window for interested project sponsors to submit complete applications to finance, construct, own, operate and maintain the Collinsville 500/230 kV substation project commenced on April 18, 2022 and closed on July 15, 2022.

Under section 24.5.2.4 of the ISO Tariff, the ISO posted the list of validated project sponsor applications with sufficient information on September 2, 2022. Four applications satisfied the information submission requirements and proceeded to the project sponsor and proposal qualification stage.

Under section 24.5.3 of the ISO Tariff, the ISO has qualified four project sponsors and proposals. The ISO qualified the project sponsors and proposals based on the criteria as set forth in tariff sections 24.5.3.1 -- Project Sponsor Qualification and 24.5.3.2 -- Proposal Qualification in the ISO Tariff. The ISO will now undertake the selection process to determine which qualified project sponsor will finance, construct, own, operate and maintain the Collinsville 500/230kV substation project. The qualified project sponsors and proposals are listed below:

- Avangrid Networks, Inc.
- Horizon West Transmission, LLC
- LS Power Grid California, LLC
- Starwood Energy Group Global, Inc.

The description of, and functional specifications for, the policy-driven Collinsville 500/230 kV substation transmission solution can be found on the ISO website at:
