**To:** Angelina Galiteva, Chair, Board of Governors  
John Prescott, Chair, EIM Governing Body

**From:** Roger Collanton, Vice President, General Counsel and Corporate Secretary

**Date:** October 16, 2020

**Re:** Notice of Planned Decisional Classification for “Variable Operations and Maintenance Cost Review”

---

***Any objection by the Chairs to this decisional classification is due by October 23, 2020.***

This is formal notice of ISO Management’s decisional classification for the “Variable Operations and Maintenance Cost Review” initiative. Any objection by the Chairs to the decisional classification is due by October 23, 2020. Otherwise, this initiative will be presented for decision consistent with the classification described below.<sup>1</sup>

This initiative falls within the EIM Governing Body’s advisory role (E2). The proposed changes would be generally applicable to the entire CAISO market footprint, both the real-time and day-ahead market, and are not EIM-specific. In addition, the primary driver for addressing these topics is not specific to the EIM balancing authority areas, but rather was an internally-driven review.

This classification is consistent with the classification presented in the Briefing on Policy Outlook at the March 12, 2020 EIM Governing Body meeting.

The draft final proposal for this initiative is located [here](#). Additional relevant papers for this initiative are located [here](#).

Written stakeholder comments on the draft final proposal, including the proposed classification, were due September 2, 2020. There were no objections to the decisional classification in the draft final proposal.

---

<sup>1</sup> The process is described in the [Guidance for Handling Initiatives within the Decisional Authority or Advisory Role of the EIM Governing Body](#).
