Re: Notice of Planned Decisional Classification for “Inter-Scheduling Coordinator Trades in Regional Markets”

Any objection by the Chairs to this decisional classification is due by September 20, 2024.

This is formal notice of Management’s decisional classification for “Inter-Scheduling Coordinator (Inter-SC) Trades in Regional Markets.” This initiative proposes to extend inter-SC trade functionality, for trades of energy, across the wider market footprint to the Western Energy Imbalance Market (WEIM) and Extended Day-Ahead Market (EDAM) balancing areas to support market participant business needs. Management believes that the WEM Governing Body has joint authority with the ISO Board of Governors over these proposed changes.

Any objection by the Chairs to this decisional classification is due by Friday, September 20, 2024. Otherwise, the initiative will be presented for decision consistent with this classification.¹

The proposed tariff rule changes contemplated in this initiative are “applicable to the WEIM/EDAM entity balancing authority areas, WEIM/EDAM entities, or other market participants within the WEIM/EDAM entity balancing authority areas, in their capacity as participants in WEIM/EDAM.” Therefore, the decision to approve these changes falls within the scope of joint authority.

Written stakeholder comments on the draft final proposal were due September 16, 2024. No commenter objected that the proposed classification is incorrect under the currently effective rules.

The draft final proposal for this initiative is located [here](#). Additional relevant papers for this initiative are located [here](#).

¹ The process is described in the “Guidance Document,” available [here](#).
