

# Notice

**To:** Andrew Campbell, Chair, Western Energy Markets Governing Body  
Joseph Eto, Chair, ISO Board of Governors

**From:** Roger Collanton, Vice President, General Counsel, Chief Compliance Officer and Corporate Secretary

**Date:** July 3, 2026

**Re:** Notice of Planned Decisional Classification for “Interconnection Service Capacity and Deliverability Retention for Non-Operating Generating Facilities”

---

---

***Any objection by the Chairs to this decisional classification is due by Wednesday, July 8, 2026.***

This is formal notice of Management’s decisional classification for “Interconnection Service Capacity and Deliverability Retention for Non-Operating Generating Facilities” initiative. The objective of this initiative is to codify and clarify policy that defines a Generating Facility’s rights to retain Deliverability and Interconnection Service Capacity when a generator ceases operation.

Management believes that the decision falls solely within the authority of the ISO Board of Governors. The tariff amendments proposed in this initiative are not “applicable to WEIM/EDAM Entity balancing authority areas, WEIM/EDAM entities, or other market participants within WEIM/EDAM entity balancing authority areas, in their capacity as participants in the WEIM/EDAM.” Rather, they apply only to the ISO controlled grid and the ISO balancing authority area. Therefore, the decision to approve these changes falls outside the scope of the WEM Governing Body’s primary authority.

The WEM Governing Body also has an advisory role that extends to any “proposals to change or establish tariff rules that would apply to the real-time and/or day-ahead market but are not within the scope of its primary authority.” This initiative, however, does not propose changes to the rules of the real-time or day-ahead markets.

Any objection by the Chairs to this decisional classification is due by Wednesday, July 8, 2026. Otherwise, the initiative will be presented for decision consistent with this classification.<sup>1</sup>
