

Preliminary Projects for 2024-2025

Project Description	
1	Campus operations annual funding
2	Congestion revenue rights (CRR) phase 2
3	Control center modernization 2025
4	EDAM CAISO BAA participation rules
5	End-of-life technology & vulnerability remediation 2025
6	Energy management system (EMS) upgrade
7	Energy storage modeling enhancements
8	Facilities reserve annual funding
9	FERC 2023 generation interconnection enhancements phase 2
10	FERC 760 enhancement of electricity market surveillance and analysis
11	FERC 881 managing transmission line ratings
12	FERC Order 897 transmission and extreme event planning
13	Foundational critical infrastructure hardware and software refresh 2025
14	Gas resource management coordination
15	Green house gas coordination
16	Initialization funding for capital projects
17	OASIS bulk download phase 2
18	Operation foundational improvement 2025
19	Penalty enhancements - demand response, investigation, and tolling
20	Plant Information (PI) web services phase 2
21	Price formation enhancements
22	Project office internal labor
23	Renewable and load forecast enhancements
24	Resource adequacy enhancements
25	Resource sufficiency evaluation enhancements phase 3
26	Subscriber participating transmission owner model
27	Technology foundational improvements for production 2025
28	Variable energy resources and storage dispatch enhancements
29	Western energy market enhancements
