# 2024 Roundtable – Stakeholder Input Requested

- Stakeholder engagement essential to successful roundtable process
- RIF sector liaisons will seek sector input in February and March 2024
- Questions for stakeholder consideration:
  - What are individual stakeholder or sector priorities for 2024 and longer term?
  - How can the catalog be streamlined so that initiatives that have been addressed, can be resolved in another way, are no longer needed, or do not represent stakeholder priorities can be removed?
  - What processes do you suggest for the RIF to consider in conducting the roundtable?
  - As a stakeholder, how can the RIF sector liaisons best facilitate your participation in the roundtable process?
    - Sector-level representation at the roundtable
    - Providing time at the roundtable meeting for individual stakeholders to express positions
- If you have views on these or other topics relating to the roundtable implementation, ***please communicate with your sector liaisons or RIF leadership***
