Southern California Edison (SCE) presents additional comments on the California Independent System Operator’s (CAISO) April 29, 2016 Tariff Proposal<sup>1</sup>.

#### **Section 27.11.**

SCE recommends the following change:

The CAISO may enforce constraints that limit the maximum **and/or** minimum amount of natural gas that can be burned by natural gas-fired resources, based on the CAISO’s anticipated limitations in applicable gas regions during specific hours.

This would allow, if necessary, the CAISO to simultaneously enforce minimum and maximum gas usage.
