

Demand and Distributed Energy Market Integration (DDEMI)

Working Group Schedule

The California ISO would like to present an updated tentative schedule for the Demand and Distributed Energy Market Integration (DDEMI) working groups. These sessions will focus on the development of problem statements for the remaining themes identified by submission into the 2024 Policy Roadmap and Catalog process and stakeholder conversations to date.

The schedule below lays out specific topics for each session, to allow stakeholders sufficient time to prepare for each discussion, including any presentations on topics of interest, and to ensure that the thematic areas in scope are represented within the Working Group conversation.

Important Notes:

- **All dates are tentative until noticed by the ISO.** Please check the DDEMI initiative webpage for the latest information.
- The meeting format and exact times will be confirmed within each meeting notice
- Stakeholders are highly encouraged to present in thematic areas of interest. Please contact stakeholderaffairs@caiso.com to arrange a presentation.
- Informal feedback is encouraged during each Working Group discussion, with opportunities for formal written comments to be provided following each Working Group or through updates to the DDEMI discussion paper. The paper will be updated as the Working Group transitions to the next theme..
